

*The warm heart of your home...*

# Horse Flame® – efficient, cleaner burning and affordable too.

PRODUCED BY THE SAME people who make Ireland's best-selling Olymberyl® stove range, you can be confident that every Horse Flame® stove features the same strong brand credentials – outstanding quality, supreme reliability and all round value for money.

Less traditional looking than its sister brand, Horse Flame stoves are designed with clean burning in mind. For example all of the stoves benefit from a large airwashed glass, with window sizes generally much greater than rival stoves so you always get a great view of the fire. The *Artemis* is our most popular stove and has been designed to heat a typical living space efficiently as well as be very easy to use – there's even a small boiler version which can heat up to two radiators or provide domestic hot water, making it the ideal choice for a holiday cottage or workshop. This is just one of the impressive choice of boiler options. The biggest being the 26 kW *Firebird* boiler stove which is capable of heating up to 16 radiators. All of our boilers are guaranteed for 5 years (along with the bodywork) to provide you with real peace of mind.

CE Tested & Approved in Europe  
EN13240 Standard  
ISO 9001:2000

With the Horse Flame range there's a stove for every situation – the superb wood burning Pony (top), the black enamel Regis (middle) and the big Yarrman 18kW boiler, all make a wonderful focal point for any living space.

## The Firebird 3 HF577B

**BOILER**

UNTIL NOW there has been an extremely limited choice of high output wood and multi fuel boiler stoves capable of delivering the kind of heat that larger properties need. Try and find one that will also look equally good in a traditional or contemporary styled home. . .

Enter Horse Flame's new Firebird 3 designed and built by the same people who make Ireland's biggest selling boiler stoves, so you can be sure that it will give you many years of trouble-free performance.

Firebird's solid cast iron construction, subtle detailing and supremely practical fire chamber along with easy-lock double doors simply put it in a class of its own. And then there's the competitive price. . .

### Performance and Sizes

Nom output - room	10.0kW / 34,140BTU
Nom output - water	16.0kW / 54,620BTU
Minimum efficiency - wood	< 75.0%
Maximum CO emissions	0.3%
Top flue outlet only (mm)	6" / 150
Log length (mm)	18" / 450
Stove net weight (Kg)	232.0
Dimensions	H830 W800 D600
From centre of top flue to back (mm)	200
Clearance to combustible materials (mm):	
Top	800
Sides	300
Rear	300

## The Artemis HF317

● Enamel Option
